

Emergency Medical Services

The Pilot Rock Fire District provides emergency medical services to the City of Pilot Rock and surrounding 600 square miles in the form of a Quick Response Team (QRT). The "QRT" consists of Certified First Responders anywhere from Emergency Medical Responders (EMR), Emergency Medical Technician's (EMT), Paramedics and Registered Nurses. The Pilot Rock Fire District QRT unit coordinates with Pendleton Fire & Ambulance as our transporting ALS agency to the hospital. Recently, the Fire District upgraded our cardiac monitor/defibrillator with help from a Wildhorse Foundation grant. This grant money helped the QRT to purchase a new Zoll E-series monitor/defibrillator that also takes blood pressures, blood oxygen saturations, and pulse rates. This helps our medics to provide a better quality of patient care to the people of Pilot Rock.

Medical Equipment

Our medical equipment consists of a new cardiac monitor/defibrillator, airway bag, and medical box that is among many items carried on the ambulance. The newest item to the District is called an AutoPulse. This piece of equipment will perform CPR on patient's who have experienced cardiac arrest...

Medical Training

Members of the QRT train on equipment, protocols, and procedures. Every medic from the First Responder level up to EMT-Paramedic needs to receive training on new medications, new procedures, documentation, as well as, refresher training on current standards. The District recently purchased a new...
